### "The Route is the Thing."

Any American Railway Guide of theatrical routes is far from complete if mention of the Pennsylvania Railroad System is omitted.

It is like the play of Hamlet with Hamlet left out.

The Pennsylvania Railroad, with its magnificent and comprehensive system and its far-reaching connections, stretching out into every quarter of the land, appeals in the strongest manner to the judgment of every theatrical manager who conducts a company on the road. In the first place, the Pennsylvania Railroad connects all the big cities of the country by bands of steel. The smaller cities and towns are like notches cut on the main stem or the branches.

The Pennsylvania Railroad is the most substantially built, the best protected, and the best equipped railroad in this country of ours.

The Pennsylvania Railroad is the best line for theatrical people, because its equipment for this particular line of traffic is complete and its superior facilities offer better service and more satisfactory accommodations.

The Pennsylvania Railroad made the greatest theatrical movement in history, when in June, 1876, it carried by special train, Jarrett & Palmer's Company of players from New York to San Francisco in eighty-four hours and seventeen minutes.

The Pennsylvania Railroad is equal to any emergency that can arise in the handling of theat-rical traffic.

Therefore it is the Star Line of America.

Its representatives are

## MJULIUS CAHN'S COLUDE IN OFFICIAL GUIDE IN

### Greeting.

N submitting the first number of Julius Cahn's Official Cheatrical Guide to the judgment and favor of the theatrical profession and those associated in a general way with the theatrical business, the compiler hopes that he is presenting to them a compendium of information more thorough in its general

details and more accurate in its various topics than any work of the kind that has ever before been issued. It has been his endeavor to collect in as compact a form as possible the varied matters of interest and value that apper-

tain to the conduct of theatrical affairs.

Mr. Cahn's long and active experience in the theatrical business and as the Manager of Charles Frohman's Booking Department, impressed upon him the need of a complete and official Theatrical Guide that would give the managers of theatres throughout the country, the managers of traveling attractions and others closely interested in their affairs, a complete and exhaustive volume pertaining to the various branches of the business, arranged in a concise and clear manner, so as to make it both valuable and available as a book of reference. With this end in view new features have been introduced. No expense or care has been spared in obtaining the various data, and the compiler feels that he can safely submit it to the judgment of his subscribers with the assurance that they will adjudge it to be as nearly perfect as could be hoped for in a first issue of this kind

Sources of information are sometimes at fault, for which he feels confident that due allowance will be made. In some instances towns have been omitted, due to the fact that managers of the theatres in those places did not feel sufficient interest to send the desired information. Should any errors be discovered it will be considered a great favor to have them communicated at once, and they will be rectified in the next issue. No effort will be spared

to make it as thoroughly up to date as possible.

In conclusion, Mr. Cahn desires to thank his many friends and business acquaintances for their kindness in furnishing the information requested of them, and he trusts that they will be sufficiently impressed with the valuable assistance they have lent him and continue to merit his gratitude by sending such further information and new facts as will be of mutual advantage to all concerned in the welfare of the theatrical business.

To the advertisers he extends his grateful appreciation for their liberal support and cheerfully commends them to his subscribers and the profession generally as deserving of their good-will. He feels that he is sending "a good thing" out into the world, and trusts to the generosity of his friends and subscribers "to push it along," for which he extends in advance his genuine appreciation and sincere thanks.

No line in the world equals the New York Central in the comfort and speed of its trains and the beauty and variety of its scenery.

> In the opinion of a prominent English expert, the New York Central possesses the most perfect system of block signals in the world.

8½ hours, New York to Buffalo; 9½ hours, New York to Niagara Falls; 24 hours, New York to Chicago; 21½ hours, New York to Cincinnati; 29½ hours, New York to St. Louis, via the New York Central.

The most comfortable to St. Louis is the New York Central.

The best line to Cincinnati is the New York Central, through Buffalo and Cleveland.

The direct line to Niagara Falls is the New York Central.

Traveling by the New York Central, you start from the center of the city of New York, and reach the center of every important city in the country.

## THE MASSACHUSETTS MUTUAL LIFE INSURANCE COMPANY,

SPRINGFIELD, MASS.

Incorporated 1851.

Is one of the oldest in the United States, It was incorporated in the year 1851 by the State of Massachusetts, which was the first in the Union to inaugurate an "Insurance Department," thus instituting State supervision over its companics; it was also the first State to legislate concerning the forfeiture  $\epsilon$  policies of life insurance. Its famous non-forfeiture law was passed in 1880, and amended and perfected in 1887.

Under this law THE MASSACHUSETTS MUTUAL LIFE writes a policy which interprets itself. It is the only company whose POLICY CONTRACT FULLY INTERPRETS itself to the insured; each and every policy it writes CONTAINING IN WRITING BOTH PAID-UP AND CASH VALUES FOR TWENTY YEARS, also a copy of the law controlling it, so that there is no possible chance to misunderstand its conditions.

It is the custom of the Company to make cash loans on its policies for such amount as the cash surrender value will warrant, but no loan of less than \$50 will be made.

It costs no more to have this advantage,

HAGEN'S PATENT TOGGLE SHOE

Patented June 11, 1895.

My invention relates to an improved Shoe for the frames of stage scenery, and has for its object to provide simple, inexpensive and efficient means for securely fastening and rigidly bracing together the different portions of the frames in such manner as to avoid weakening any part of the frames; to provide said Shoes with means for the attachment of the braces employed for holding the frames in an upright position; and finally, to so construct the Shoe that rails having rounded edges may be employed, whereby liability of the canvas being cut or the paint abraded is avoided.

### MEXICO.

Mexico is undoubtedly a coming theatrical field for recognized and worthy operatic, spectacular and musical attractions, as the theatre-goers are appreciative and pay liberally for meritorious entertainments. The theatres are now mostly controlled by sharing managers, the newspapers generous with space, and the railroads make rates of 11/2 to 2 cents a mile for parties of five or more, and are controlled and operated by Americans of broad and liberal views. The duty on printing taken into Mexico from the United States has lately been withdrawn, although now in a few cities a small tax or nominal charge is made for the privilege of billing and advertising. The laws of Mexico are very rigid regarding theatrical advertising; every scene and act must be produced as represented, failure of which is subject to a heavy fine by the Governor of the city.
